1.1 Brief History

Korabloom Herbal haircare was established in 2026 in Durban, KwaZulu-Natal, South Africa. It was founded by Naomi Kaja Kongolo to address the growing demand for natural and herbal hair care solutions. The business focuses on helping individuals experiencing hair loss, thinning edges, weak hairlines, and scalp damage through plant-based products. Inspired by traditional herbal remedies and modern hair care practices, Korabloom developed natural formulations using ingredients such as rosemary, fenugreek, hibiscus etc. and nourishing oils to promote healthy hair growth and scalp wellness.

1.2 Mission Statement

"To provide safe, effective, and affordable herbal hair care solutions that promote healthy hair growth and restore confidence naturally. "

1.3 Vision Statement

"To become South Africa's leading herbal hair care brand, recognized for delivering natural, innovative, and trusted solutions for healthy hair growth. "

1.4 Target Audience

- Women aged 18-45 experiencing hair thinning and hair loss
- Individuals with natural, curly, coily, and textured hair
- Students, young professionals, and mother
- Consumers seeking herbal and chemical-free products
- Social-media-active beauty and wellness enthusiasts
- Customers interested in organic and natural beauty solutions

2. Website Goals and Objectives

2.1 Primary Goals

- Increase online product sales
- Build brand awareness and credibility
- Educate consumers about herbal hair care benefits
- Generate customer enquiries and lead
- Support digital marketing campaigns
- Establish a professional online presence

2.2 Key Performance Indicators (KPIs)

The following KPIs will be used to measure the success of the new website:

KPI Metric	Baseline Target (Month 3)	Growth Target (Month 6)
Target Website Visitors	1,000 unique visitors	4,500 unique visitors
Online sales	30 orders/month	100 orders/month
Email subscribers	50 new subscribers/month	65 new subscribers/month
Social media referrals	1,500 referrals	4,000 referrals
Customer enquiries	10/month	40/month
Mobile traffic	40% of total traffic	55% of total traffic

3. Current Website Analysis

Korabloom currently relies primary on social media and direct messaging platforms for sales and customer engagement.

3.1 Strengths of the Existing Website

- Active social media presence
- clear niche market focus
- Growing demand for natural hair products
- Strong customer interest in herbal solutions

3.2 Weaknesses and Areas for Improvement

- No dedicated business website
- limited online product catalogue
- No online ordering system
- limited search engine visibility
- No customer review system
- No automated customer support features
- Lack of educational content and blogs
-
-

4. Proposed Website Features

4.1 Core Pages

- Homepage
- About Us
- service
- Gallery (before and after results)
- blog and hair care tips
- Frequently Asked Questions
- Contact Us — Map integration, contact form, WhatsApp button, and live chat
-
-
-
-

4.2 Key Functionality

- Online product ordering system
- Mobile responsive design
- Newsletter subscriptions
- customer review section
- SEO optimization
- Product search functionality
- promotional banners and discounts
- Social media integration
- WhatsApp integration

5. Design and User Experience

5.1 Design Aesthetic and Branding

The website will reflect Korabloom's natural and herbal identity while creating a modern beauty brand experience.

Design Style	Natural wellness and modern beauty
Inspiration	Herbal ingredients, healthy hair growth, botanical beauty
Aesthetic	Clean, editorial layout reminiscent of high-end hair brands

5.2 Colour Scheme

Earth Brown (#6D4C41)	Cream White (#FFF8E7)	Primary Green (#4F7942)	Leaf Green (#7CB342)

5.3 Typography

Primary Heading Font	Playfair Display — Elegant serif for hotel name, page titles, and hero text
Secondary Heading Font	Montserrat (SemiBold) — Clean sans-serif for section headings
Body Copy Font	Open Sans (Regular/Light) — Highly readable for descriptions and content
Accent / CTA Font	Montserrat (Bold, uppercase tracking) — Used for buttons and labels
Font Hierarchy	H1: 48–64px H2: 32–36px H3: 24–26px Body: 16px Captions: 13px

5.4 Layout and Design Approach

- Full-screen hero video or high-quality photograph on the homepage with an overlay hair widget
- Grid-based room display with hover effects revealing key room details and a direct 'order Now' CTA
- Product showcase grid
- Before and after transformation gallery
- Educational content blocks
- Full-bleed image sections alternating with text panels for visual rhythm

5.5 User Experience Considerations

- Navigation — Maximum three-clickdepth to any page; primary navigation with clear dropdown menus
- Accessibility — Adequate colour contrast, alt text for all images, keyboard navigation
- Mobile-first design
- Easy customer support access
- Page Load Speed — Target under 2.5 seconds; lazy image loading, CDN implementation

6. Technical Requirements

6.1 Hosting and Domain

Domain Name	www.korabloom.co.za
Domain Registrar	Domains.co.za or Afrihost (South African registrar recommended)
Hosting Type	Cloud Hosting
Hosting Provider	Afrihost or Hetzner South Africa (local CDN for low latency)

SSL Certificate	Let's Encrypt (Free) or Comodo Positive SSL — mandatory for booking engine
Email Hosting	Professional email (e.g., Korablooherbalhairc.co.za) via Zoho
CDN	Cloudflare — for performance, security, and South African edge servers
Backup	Daily automated backups

6.2 Technology Stack

Frontend	HTML5, CSS3 (with CSS Variables & Grid/Flexbox), JavaScript (ES6+)
CSS Framework	Tailwind CSS — for rapid, consistent utility-based styling
Frontend Framework	React.js (Next.js) — for server-side rendering and SEO benefits
Backend / CMS	WordPress with Elementor Pro — for ease of content management
Booking Engine	HiRUM or SiteMinder PMS integration, or custom API
Payment Gateway	PayFast (South Africa) with card and EFT payment support
Database	MySQL (via WordPress) with Redis caching
Version Control	Git (GitHub) — for codebase management and collaboration
Analytics	Google Analytics 4 + Google Search Console + Hotjar (heatmaps)

7. Timeline and Milestones

The following project timeline outlines a realistic 6 months development schedule from project initiation to live deployment:

Phase	Milestone	Duration / Date
Phase 1	Project planning	Week 1
Phase 2	Research and content collection	Month 1
Phase 3	Wireframes and design weeks	Month 2

Phase 4	Frontend Development	Month 2 1/2
Phase 5	Product catalogue setup	Month 3
Phase 6	Payment integration	Month4
Phase 7	Testing and quality assurance	Month5
Phase 8	Website launch	Month 6

8. Budget Estimate

The following budget estimate is based on current South African market rates for professional web development, hosting, and ongoing maintenance. All amounts are in South African Rand (ZAR) and inclusive of VAT.

Category	Description	Estimated Cost (ZAR)
Discovery	Research and planning	R 3,500.00
Design	UI/UX design	R 7,500.00
Development	Website Development	R 15,000.00

E-commerce	E-commerce setup	R 5,000.00
Content	Content Creation	R 4,000.00
SEO Setup	On-page SEO, keyword strategy, Google Business Profile, sitemap submission	R 3,500.00
Testing	QA testing, accessibility audit, cross-browser/device testing, performance audit	R 2,000.00
Hosting & Domain	SSL certificate, CDN (Cloudflare) Domain registration (.co.za) for 2 years, email hosting setup	R 1,500.00
Training	Training and support, user manual documentation	R 2,000.00
TOTAL ESTIMATED BUDGET		R 44,000

9. References

The following references informed the research and recommendations in this proposal:
